GLEBE ROAD UTILITY AND CONSTRUCTION

The Town of Easton will be performing street construction on Glebe Road from Marlboro Avenue to Ashby Commons Drive. Easton Utilities will be installing new electric ducts for a new interconnection 69kv electric power line from plant one to plant two. The contractor for this project is David A. Bramble of Chestertown Maryland. There will be new sidewalks, crosswalks, pedestrian signals, traffic signal improvements and additional storm drain improvements through the construction zone.

There will be street closures and lane closures during this project at various times. Detour routes will be established and posted. There will also be electronic message boards posted to remind motorists of the work zone. On-street parking will not be permitted during the project duration which is estimated to start November 26, 2012 and last 180 days, weather permitting. Emergency access will be coordinated between the contractor and Talbot County Emergency Management Center.

A public meeting regarding the above mentioned project will be held on Tuesday, November 20, 2012 at 7:00 PM at the Town of Easton, 14 South Harrison Street. If you have any questions, or are unable to attend the meeting please contact Brian Hause at 410-822-2525 ext. 138. We apologize for any inconvenience and thank you in advance for your cooperation while we work to improve the quality of our streets.
